

Introduction

In October 2015, the Board of Directors of Central Bank of Kuwait (CBK) approved the guidelines on the implementation of the Net Stable Funding Ratio (NSFR) to be applied to banks operating in Kuwait. The guidelines were part of the CBK's implementation of Basel III reforms.

The main objective of the NSFR is to promote the resilience of the banking system by improving the funding profile of banks by ensuring they have sufficient level of stable funding in relation to their assets and commitments. The NSFR thus promotes banks to rely on funding from stable sources and long-term borrowing in order to reduce the risks of disruptions which might impact the bank's liquidity position.

The Available Stable Funding (ASF) figure is measured according to the relative stability of funding, based on their duration and behavioural characteristics of funding sources. For instance, capital and deposits from retail household sources are considered more stable than wholesale funding. Moreover, long-term funding is generally assigned higher stability weights relative to short-term funding.

The Required Stable Funding (RSF) figure is measured based on the liquidity, quality and tenor of assets and contingent exposures. Generally, short-term lending and highly-liquid assets require lower levels of stable funding to support.

The NSFR is reported and monitored at three organizational levels: *Local level* (NBK Kuwait excluding its overseas branches), *Bank-wide level* including NBK Kuwait and overseas branches (NBK SAKP) and *Group Level* [including all overseas branches and subsidiaries (NBK Group)].

Results Analysis and Main Drivers

NBK maintained comfortable stable funding buffers during the three months ending June 30th, 2023. Available Stable Funding at NBK Group level as of end of June 30th was around KD 22.4 billion against KD 20.4 billion of Required Stable Funding, resulting in NSFR of 109.72%. Despite the impact of global geopolitical tensions and COVID-19 on the global economy and financial markets in the second quarter of 2023, there was no adverse effect on the Bank's NSFR position.

The main drivers behind the Available Stable Funding are the adequate capital base, sizable Retail deposit base, and long-term funding from non-financial companies and institutional clients. The capital base (including Tier-1 & Tier- 2 Capital Security) formed around 20%, retail deposits (including deposits from small-sized business customers) formed 47%, and wholesale funding formed 30% of the total Available Stable Funding, after applying the relevant weights.

The Required Stable Funding comprised primarily lending to companies, businesses, corporations, retail clients and financial institutions.

The stock of High-Quality Liquid Assets (HQLA), which includes cash and reserve balances with the Central Bank of Kuwait (CBK) and other central banks, government debt issuances in domestic and foreign currencies as well as debt issuances by highly-rated companies stood at KD 6.69 billion (before applying the RSF factors). Due to their high quality and liquid characteristic, these assets require no or low amount of stable funding. Accordingly, the HQLA's constituted only 4.95% of the Required Stable Funding after applying the relevant weights.

"Performing" loans constituted 78.16% of the total RSF after applying the relevant weights.

Non-HQLA investments, contingent funding obligations, such as committed credit facilities, guarantees and letters of credit (LCs), and other assets, constituted the remaining 16.89% of the Required Stable Funding.
