I. Composition of Capital

1. Composition of Regulatory Capital

For regulatory purposes, the capital base is divided into: (i) Common Equity Tier 1; (ii) Tier 1 Capital and (iii) Total Capital

Common Equity Tier 1 capital comprises shareholders' equity, retained earnings, eligible reserves and related eligible non-controlling interests. The book values of Goodwill and Intangibles are deducted along with other regulatory adjustments.

Tier 1 Capital consists of Common Equity Tier 1 capital and Additional Tier 1 capital which includes eligible Perpetual Tier 1 Securities and eligible portion of non-controlling interests.

Total Regulatory Capital includes Tier 1 capital and Tier 2 capital which consists of the allowed portions of general provisions and certain additional eligible non-controlling interests.

The below table summarizes the composition of capital and ratios:

requirement by Central Bank of Kuwait until 31st December 2020.

A detailed breakdown of the Group's regulatory capital position under the Common Disclosures template as stipulated under the Pillar 3 section of the CBK Basel III Capital Adequacy framework is presented in Table 7 of the Appendices Section.

2. Reconciliation requirements

The basis for the scope of consolidation for accounting and regulatory purposes is consistent for the Group.

In order to provide a full reconciliation of all regulatory capital elements to the balance sheet in the financial statements, a three step approach has been mandated under the Pillar III disclosures section of the CBK Basel III framework.

Capital and Leverage Disclosures: 30th June 2020

The below Table 2 provides the comparison (Step1) of the balance sheet published in the interim condensed consolidated financial statement and the balance sheet under the regulatory scope of consolidation. Lines have been expanded and referenced with letters (Step 2) to display the relevant items of the regulatory capital.

II. Leverage

1. Leverage ratio

In October 2014, CBK issued the regulations on the 'Leverage ratio' introduced by BCBS as part of the regulatory reforms package. This transparent and non-risk based metric supplements the Capital ratio to act as a backstop measure to limit excessive build-up of on and off-balance sheet exposures.

The Leverage ratio is a separate, additional requirement from the risk-based capital requirement. It is defined as the 'capital' measure divided by the 'exposure' measure. The capital measure is made up of Tier 1 capital. The exposure measure is a sum of on-balance sheet assets, derivative exposures; securities finance transactions and off-balance sheet exposures.

The Group is in compliance with the requirements stipulated by CBK for the Leverage ratio set at a minimum of 3%.

The Leverage Ratio for the Group at consolidated level is:

Table 4	
Tier 1 Capital (KD 000s)	3,151,815
Total Exposures (KD 000s)	32,231,304
Leverage Ratio (%)	9.8%

2. Leverage Ratio Exposures

The below Table provides the details of the Total Exposures for Leverage Ratio:

Table 5

Total Exposures	KD 000s
On-balance sheet exposures	29,097,378
Derivative exposures	110,247
Off-balance sheet items	3,023,679
Total exposures	32,231,304

The details of the Leverage Ratio in the format stipulated for public disclosure under the Pillar 3 framework has been provided in Table 8 of the Appendices Section.
